### President's Letter: July 2019

Norm Anderson

Greetings Woodworkers:

Thanks to all that attended the shop tour at "ROUGH AROUND THE EDGES" with James Bowe. I was unable to attend due to an issue with my eye. I hope everyone had a good time and learned a little about woodworking. I am very sorry I missed and had really wanted to visit his shop. I had an unexpected issue with an eye. It was similar to a sty, however it was in an oil gland and not in a tear duct. I did go to the doctor and got some meds that have helped, but it was really more a matter of time. It also kept me out of my shop and my remodeling is going slow, but finally back on pace. I have almost finished the downdraft sanding table and will cut ducting and plumb now that I know where everything will fit. I also bought a new drum sander and am ready to install it and plumb to the dust collector.

**NEXT MEETING: July 22<sup>nd</sup>, 6:30 PM "Acoustic Guitar Making" by Bill Kinney at his home shop.**

**William Kinney  
3710 Cross Timber Ct.  
Columbia, Mo. 65203**

Bill says he has adequate parking for our group and most of us will meet there. We will also have a small carpool meeting at the Boone County Millworks.

**THE CARPOOL WILL LEAVE EARLY, around 6:00 in order to get to Bills shop in plenty of time.**

Copy from E-mail from Bill about directions, the presentation, and his personal bio:

My address is 3710 Cross Timber Ct. We are located in southwest Columbia off of Nifong (Vater School Rd) in a subdivision called Spring Creek. We are in the first Spring Creek development. Head west on Nifong past Mill Creek Elementary and route KK. As you head down the hill, the subdivision is on the right. Turn left upon entering and left again. Look for any area to park. Parking can be anywhere along

the cul-de-sac. We are at the end of the cul-de-sac. Our neighbors are used to us having people over. I am going to get some extra chairs and should have enough for about 20 people.

Bio: I am an ear nose and throat physician working out of both Boone and MU. I have been in Columbia going on 23 years. I started woodworking in 8th grade. Our school has a full time shop teacher. Most of my work has been furniture. I started taking guitar lessons about 2 years ago. I decided that I wanted to try to make a guitar. I am self taught learning from videos and reading off the Internet. I made two guitars the first time gifting one to my guitar teacher. I use the second one as my everyday guitar. I decided to try a third guitar to see if I could improve my skills. The third one turned out really nice and was gifted to the Columbia Independent School auction. I have enjoyed learning to build a guitar as it has required more work with hand tools. I am currently helping a middle school student build a guitar. I enjoy teaching and would like to explore opportunities to continue to teach woodworking as I head closer to retirement. I have been following the Midwest Woodworking emails and look forward to learning from the members.

I am going to do a short presentation on the steps involved in guitar building via a powerpoint presentation. I will start with a description of the different parts as well as the different styles of guitars. Certain steps require specific techniques that can be accomplished with a few specialized jigs that will be highlighted. I will end with my approach to applying finish to the final product. I will have a number of the jigs set up in the shop to show how they help to accomplish the different steps. We can do a walking tour of the shop for those interested. I will have home brew Vanilla Porter and an IPA for those interested in beer as well as some water/soft drinks.

Bill

William C. Kinney, MD, MHA

We will have a very short meeting to discuss officers and dues and probably not have a drawing as I haven't picked up anything.

I have not yet placed the order for hats, but plan to get it done sometime soon. I usually say that very few things get done until after they are started so I'd better get started.

#### FUTURE MEETINGS:

August: I have finally gotten some time in the shop and plan to have a shop tour and a discussion on dust collection, unless we can get a better offer for a meeting. I plan to have my shop system up and running by then.

September we will probably need a toy car assembly workshop to get ready Christmas and our booth at the Pumpkin Festival: Saturday October 12 9:00 AM-5:00 PM, Sunday Oct. 13 9:00-5:00 PM. We will need some help at the display booth on both days of the festival. There will be a sign-up sheet coming out in the next newsletter and I do hope we get more help this year.

We will also need some members to get in the shop and build some cars and toys for the festival and our Christmas toy give a way. I would love to see most members make a hundred cars to help. There are currently a few members that make most of the toys. Please help out for the club and make some cars or other toys and bring them to the meeting. You can cut your own design shapes from scrap 2x4 pine scrap or use some of the car shaped moulding from Terry Selby and just cut to about 2" width, drill holes for axles and smooth over the edges with router or sandpaper. These are really very nice cars that any kid will treasure for a lifetime especially when some good woodworker and craftsman make them smooth and nice.

### **Boy Scout Invention Jamboree 2019**

Below is an email I received from Thomas Yang with an invitation to participate in their Invention Jamboree 2019 to be held at the Lake of the Ozarks Scout Reservation, 525 Camp Hohn Drive, Gravois Mills, MO on September 13-15. This would be a great opportunity for members of the MWA to share their knowledge and talent with young people. Please consider this event if your schedule permits. It would be great if two or three (or more) MWA members would be able to attend. Mr. Yang sent a copy of the flyer describing the jamboree which I can email to anyone who is interested.

Robert,

This is Thomas from the Boy Scouts of America. I came to one of your meetings a while ago with one of our Invention Trailers. We then gave some of you all a tour at our camp at the Lake of the Ozark Scout Reservation. We are hosting an Invention Jamboree this September 13-15 at the Lake of the Ozarks Scout Reservation. The Invention Jamboree is a celebration of Missouri's and America's inventing heritage. I have attached a flyer with some of the details. Woodworking will be one of the focuses of this event. We are looking for some woodworking talent to help lead the woodworking station at the Jamboree. I was wondering if MWA would like to be part of this event? We would be happy to promote your organization, and I would be happy to talk to you about the specifics.

I look forward to hearing from you soon.

Best,

Thomas

**Thomas Yang** | Invention Scouts Executive/Director of Sinquefield Invention Lab & Program Building

**BOY SCOUTS OF AMERICA**

**Great Rivers Council**

### **VOLUNTEERS NEEDED FOR PRESENTATIONS**

We could use a presentation on various woodworking topics. Topics including, but not limited to the following.

Staining and Finnish tips and techniques.

Sanding and getting wood ready for finish.

Shop safety and equipment.

Dust collection systems and equipment.

Tool maintenance and adjustments.

Jigs and Fixtures that save time

Musical instrument building (maybe cigar box guitars)

Building toys and gizmos.

Building furniture and design ideas

Anything not mentioned above that would be of interest

**Dues for 2019 are due**

Please fill out the attached woodworker form and staple your check or other legal tender to the survey and hand to the treasurer at one of the next meetings. Dues are \$20 for the Midwest Woodworkers. Dues for the Woodturners are also \$20, but for \$35 you can join both groups. Please fill out the survey and attach check or cash and hand to Tom Stauder or any officer.
