June 2008

President's Chipbox

I hated to miss the picnic and offer my apologies for not being able to attend. I heard from my wife Nancy you had a pretty good turn out in spite of the weather and everyone enjoyed good food and fellowship. I'm looking forward to seeing everyone at the June meeting on Monday Jun 23, 2008 at Boone County Millworks at 07:00 PM. We have some great prizes for the raffle from the good folks at Hut Products in Millersburg so you don't want to miss out on this raffle! They were very generous and we owe them some business if you need pen blanks, duck calls, finishing supplies or even a new Jet lathe. They also have lots of hardware and turning tools and I will be bringing some of their catalogs to the meeting.

Remember now is the time to elect a new President and Vice President and pay your dues for the coming year so we need everyone possible to attend.

-Mike Gentsch-

President MWA

Tentative Schedule of Future Events
Midwest Woodworkers' Association

Date	Day	Time	Event
June 23, 2008	Monday	7:00 PM	MWA monthly meeting at Boone County Millwork

November 24, 2008	Monday	7:00 PM	MWA monthly meeting at Boone County Millwork

Artists at the Park 2008

A few of life's little observations and vexing questions:

If croutons are made from stale bread, why do they come in airtight packages?

Why does sour cream has an expiration date?

Why isn't the number 11 pronounced "onety-one?"

If a cow laughed, would milk come out its nose?

Whatever happened to Preparations A through G?

How come one careless match can start a forest fire, but it takes a whole box to start a campfire?

Ever think who was the first person to look at a cow and say, "I think I'll squeeze these dangly things here, and drink whatever comes out?"

Why is there a light in the fridge and not in the freezer?

If Jimmy cracks corn and no one cares, why is there a song about him?

Why when you blow in a dog's face, he gets mad, but when you take him on a car ride, he sticks his head out the window?

Does pushing the elevator button more than once make it arrive faster?

Why doesn't glue stick to the inside of the bottle?

How could a cemetery raise its burial cost and blame it on the cost of living?

About the 50-50-90 rule: Anytime you have a 50-50 chance of getting something right, there's a 90% probability you'll get it wrong.

The things that come to those that wait may be the things left by those who got there first.

Why is a flashlight a case for holding dead batteries; OR a shin is a device for finding furniture in the dark?

Why is the only cure for insomnia to get more sleep?

When you go into court you are putting yourself in the hands of 12 people that weren't smart enough to get out of jury duty.

Scientists say 1 out of every 4 people is crazy. Check 3 friends; if they are ok, you're it.

If you're going to test the depth of water, never do it with both feet.
